Benjamin Tran Dinh

217 Dore Street, 94103 San Francisco - *benjamin.tdm@gmail.com* - +1-628-999-3101

Engineer, data scientist, operations researcher. I model and optimize complex problems in data-driven environments. Passionate about product design, business development and decision analysis.

Education

2014 - 2015 — **IEOR graduate student at UC Berkeley – California, USA**
Specialized in Industrial Engineering and Operations Research (GPA 3.92/4)
Graduate-level courses in Optimization, Graph Theory, Machine Learning, etc.

2011 - 2015 — **Industrial Engineering MSc at École des Ponts ParisTech – Paris, France**
Specialized in Industrial Engineering (GPA 3.88/4)
Courses in Statistics, Project Management, Operations Research, etc.
Worked in team projects in the fields of Design, Innovation and Operations Research

2009 – 2011 — **Classe Préparatoire aux Grandes Écoles – Paris region, France**
Intensive university-level program to prepare for the competitive entrance exams to the top engineering schools in France
Acquired strong knowledge in mathematics, physics and computer science

Work Experience

2015 Present — **Software Engineer at ExoNav – Oakland, CA**
Building self-driving car mapping technology, providing lane-level accuracy trajectories for complex intersections

2014 6 months — **Executive Assistant to CEO at My Impact Education GmbH – Berlin, Germany**
Supported the product development with data-driven insights
Analyzed traffic data in a web-based startup venture
Assisted the fundraising process and monitored the product launch

2013 6 months — **Supply Chain Analyst at Louis Vuitton – Paris, France**
Optimized the stock coverage for the Watches unit
Successfully implemented a new distribution tool
Enforced new policies as the main contact of all the logistic zones

2012 6 months — **Student Consultant at Argon Consulting – Paris region, France**
Designed a database and built a linear program to optimize the employee scheduling in manufacturing workshops for Louis Vuitton in a group of 5 people
Performed sensitivity and stability analysis for the model

2012 3 months — **Intern Researcher at Imperial College – London, UK**
Compared thermodynamic performances of different heating systems
Statistically analyzed data bases with R

Languages

French	native
English	fluent - TOEIC 990/990
German	intermediate

Computer Science

Web	HTML, CSS, JavaScript, Django
Scientific	Matlab, Maple, R, Pandas
Languages	Python, C++

Interests

Competed in swimming, climbing and volleyball. I was an active member of the Sports Union and President of the DJ Club at ENPC. I produce electronic music. I traveled to Vietnam, Egypt, Togo and most of Europe.
